

Erik Buschardt

Final Exam & Presentation

CSSS 5990 §08

Adv Topics / Malware

Fall II 2016

Webster University

12/12/16 7:307m ~~REVISID~~ Questions
Final Presentation ~~REVISID~~
Not allowed to do (6) Action Obj...whoops!

- ① Choose 2 phases: Recon, Delivery.
- ② a) Describe Recon & Deliv from ATK view_{pt}
b) Explain link between phases & malware used by cyber criminals
Delivery is performed via methodologies learned via recon phase (correct environment, ~~correct~~ effective format, etc.)
c) Define defenders goals for both phases:

Recon	Observe ^{excessive logins for example} abnormal behaviors
Deliv	edu users not to click emails! or install etc.

d) Describe how one would achieve goals using P/P/Tech
please see next page. (matrix)

12/12/16 4 PM

Final Presentation

Inst/C2
is 1 phase.

1) Choose 2 diff phases of KC
except last phase: Recon & Action.

2) Deliver a presentation regarding the following:

- a) Describe Recon and Action from attacker's view
- b) Explain link between phases & malware used by cyber criminals

~~1)~~ Actionable objectives on Advanced Persistent Targets are carried out via weaponized payloads. ~~and~~ ^{These payloads are} designed using specifications against a target infrastructure gathered during the Reconnaissance phase.

c) Define defenders goals for both of your phases

	How to defend against threats both known and unknown? <u>Chosen.</u>
Recon	Education of users on abnormal activities such
Action	Attempt to mitigate ^{as multiple} breach(es), implement a detection & response action plans, IR/DR/BC, etc.

d) Describe how one would achieve the goals using people, processes & technology.

Please see next page.

12/5

✓ = Confident of mastery (self)

Examples of Potential Questions

- ① What is a botnet and what are botnets typically used for? ✓
171.161.160.10
SP x y ric 1.
bankofamerica.com
- ② Your company's CEO can't access his bank's website because your DNS server is down. You have the IP Address of the website stored. Explain a temporary workaround for the CEO. ✓
Use numeric addresses or 8.8.8.8
Google Public DNS
Gotta way
also 8.8.4.4
also IPv6 are online.
- ③ Describe your understanding of a client-server architecture. ✓
- ④ Is it possible to embed a payload in another payload? Provide supporting reasons for your answer - yes or no. ✓
- ⑤ Summarize the difference between a reverse shell and shellcode. Which one is the function and which is the format? ✓
← →
- ⑥ What are the three solution components for defending in each of the Kill Chain phases? What are the goals of the attacker or defender in each phase? PPT/... ✓
- ⑦ Maltego is used for what? ✓ Maltego Carbon CE traces relationships
- ⑧ TOR is used for what? Explain. ✓
The Onion Router
Used to enable anonymous communication.
between online entities such as GPS, Social media, network infrastructure, etc.
- ⑨ Explain the role of people, process, and technology in the defending against malware. ✓
- ⑩ Provide one example of an IOC in one phase of the Kill Chain. ✓ (clicking on link from email)
Delivery: installation of a malicious package by a user
- ⑪ Give two common tell tale signs that an email is a phishing email. ✓
Common misspellings, lots of images, unusual sender address
- ⑫ Provide one example of the difference between wireshark capture and display filters. ✓
- ⑬ Name one use for the Social Engineering Toolkit, (SET). 2K things.
- ⑭ Describe how LinkedIn can be used as a honey pot. ✓
Using passive recon to learn what technologies are used in the company. Human honey pot
- ⑮ In your opinion, what is the most important phase of the Kill Chain? Defend your answer. ✓
Recon Lincoln:
6 hrs chop tree,
4 hrs sharpen axe.
to carry out intended objectives of the payload.
- ⑯ Define what is meant by post-exploitation activities. ✓
Attacker point of view

12/12 | Finals Questions (Polishing Up!)

⑥ What are the three solution components for defending in each of the ^{LM} AKC phases? What are the ^(overall/high level) goals of the attacker vs. defender in each phase?

	People (education)	Process (policies)	Technology (tools)
GOALS (Att)	◦ Social engineering ◦ recognize unauth. attempts/abnormalities	◦ Taking adv of ^{possible} lack cluster training ◦ Recon: Enforcement? Taking adv of ^{100%}	◦ Based on Recon, build weaponization tools
GOALS (Def)	◦ Train on common cybersec best practices	◦ Ensure ^{100%} mandatory compliance ◦ IR/DR/BC Processes	◦ Based on red-team pen testing etc, refine defenses defenses in network architecture.

⑨ Explain the role of people, processes & technology in defending against malware?

People: Educate users (in particular cyber pros) to recognize attempts & abnormalities

Processes: Design & implement policies to counter ~~anticipate~~ anticipated threats towards known vulnerabilities.

Technology: Build & deploy tools that will mitigate ~~the~~ these threats.

⑬ Name one (1) use for the Social Engineering Toolkit (SET).

SET is specifically designed to perform advanced attacks against the human element. SET was designed to be released with the ~~the~~ launch of social-engineer.org website, and is a standard tool of the penetration-testing toolkit.

for Final Exam subset (2 phases)

Compare & contrast:

Phase	Attackers Goals	Defenders Goals	People	Processes	Technologies (Tools)
1) Recon	<u>ATTACK</u> Find vulnerabilities, Passive: (type/qty) <u>DEFEND</u> Understand BG nature of Active target Logia attempts Mitigate using Company	<u>ATTACK</u> Proactive Regularly Educate IT/cyber professionals for ID/recon attempts <u>DEFEND</u>	<u>ATTACK</u> Explore Orgs for weaknesses in policy of Workstation enforcement's <u>DEFEND</u> Company w/ specific policy of Workstation hardware	<u>ATTACK</u> Active recon: Explore LinkedIn for technologies per tests used, fx. honeypots (falsepos) <u>DEFEND</u> Oracle	<u>ATTACK</u> Active recon: Explore LinkedIn for technologies per tests used, fx. honeypots (falsepos) <u>DEFEND</u> Oracle
2) Delivery	<u>ATTACK</u> Run Command Mitigate Try to restore Order from class. <u>DEFEND</u>	<u>ATTACK</u> Minimize user Educate Cybersec/ exec <u>DEFEND</u>	<u>ATTACK</u> Nothing to do here <u>DEFEND</u> IT Dept	<u>ATTACK</u> Tools Isolate affected workstation & servers. Post exploitation Scrub as much as possible. Objectives of payload <u>DEFEND</u>	<u>ATTACK</u> Tools Isolate affected workstation & servers. Post exploitation Scrub as much as possible. Objectives of payload <u>DEFEND</u>

Finals presentations evening: Recap

- UNMC
- 1 recon ✓
 - 2 weap ✓
 - 3 deliv ✓
 - 4 exploit
 - 5 instab/c2
 - 6 Action obj

Presenter Phases introduced

- | | |
|------------|------------------------------------|
| 1) Durgesh | 1, 4 |
| 2) Jasmin | 1, 2 |
| 3) Com | 1, 2 |
| 4) Amber | 3, 4 |
| 5) Erik | 1, 3 (3) (Too obvious?) |
| 6) Saulo | 3 3, 4 |
| 7) Ahmed | 1, 2 |
| 8) Robyn | 1, 2 |

Objectives

Obj 1 - Explain 2 phases

describe each given phase

attacker's & defender's Pov

Compare & contrast

~~Q & A~~

• Q & A

Histogram

3) Delivery

Analogy

Trojan horse
delivered inside
Castle gates

Goals
Attack

Defend

People

Process

Technology
Comm1

Erik Buschardt	Comments
Presentation	Good opening with objectives. Multiple uses of notes.
Application of Principles	Very Good. Impressive.
Use of Analogies and Stories	Server in a restaurant analogy. False news.
Responses to Questions	Botnet. Client-Server 100 Kali Linux. File Carving. False Ave.
Confidence of Delivery	Very Good.
